2005-2009

PROJECTS

-Hotel Web Visibility: created the backend of the project which analyze a hotel website and brand on web. Is using API's like Dataforseo for analyzing key words and site position on Google. Using Puppeteer for extracting data about brand from Facebook ads, Google Reviews and Google Hotels(competition prices and ratings) etc.

-**Book Everything**: booking extension for social media and wordpress, both for hoteliers and clients. Working on front web functionality for hoteliers, implementing reservations calendar, and features like setting the price, creating offers etc.

-**Connect to ads websites API's**: Connecting client's website to ads websites APIs, to instantly add/remove product/s on multiple ads websites (like OLX).

-**NodeJS documentation**: Writing NodeJs functions using Axios for Dataforseo documentation

-**Android Game With Unity**(personal project): Simple multi-level 3d game, made with Unity and C#.
